

Adjustable length abductor pillow, providing CONSISTENT heel offloading.  
Compatible with SCDs, roomy and allows visualization of tubing.  
Elevation promotes venous return & prevents hyperextension of the knee.

Soft foam adjustable straps

3" tear-off for shortening\*

2½" Calf support

Comfort curve for inner thigh

\*Original Design Features

**① Leg supports: (24" total width)**

- 2½" leg support and elevation
- Soft foam leg supports, as dictated by 2009 national guidelines
- Very soft foam will flex and allow ease of turning and repositioning of patient

**② Main body/Adjustable length\*:**

- 3" tear-off in the perineal area to shorten for stout patients or for peri-care & urinals
- Reduces length to 21"
- *Comfort Curve* for inner thigh

**③ Straps:**

- Adjustable, soft foam & Velcro® closure to prevent *device related* pressure ulcers
- Legs are held securely against the main abductor *body curve*
- Strap placement prevents constriction

**④ Internal Rotation:**

- Lower legs are secured firmly against *comfort curve* of abductor

**Notes:**

- The Standard version will provide the offloading, heel protection and elevate the lower extremities
- The Standard version is most like the old fashioned Abductor pillow, but WITH heel offloading.

STANDARD - ST25
