

Adjustable length abductor pillow, providing
CONSISTENT heel offloading and stabilization.
Slight elevation promotes venous return.

*Original Design Features

① Leg supports:

- 2½" leg support - soft foam leg supports
- Very soft foam will flex and allow ease of turning and repositioning

② Main body/Adjustable length*:

- 3" tear-off in the perineal area to shorten
Reduces length to 21"
- *Comfort Curve* for inner thigh & legs

③ Straps:

- Adjustable, soft foam & Velcro® closure to prevent *device related pressure ulcers*
- Legs are supported against the wedge
- Strap placement prevents vascular obstruction / constriction

④ Internal Rotation:

- Lower legs are gently and snugly secured against *comfort curve* of foam wedge

Notes:

- Heel-A-Hip™ will provide the abduction, offloading, heel protection and elevate the lower extremities
- The Standard version is most like the traditional abductor pillow, but WITH heel offloading & turning curve / unique rocker bottom
